SKILLS

- **Programming Languages :** C, JavaScript, SQL, Express, HTML CSS
- **Libraries & Frameworks :** Nodejs, Express, React, Nextjs, Redux, MongoDB, Firebase
- **Tools & Platforms :** Git , Postman, Docker

PROJECTS

BlogSphere - Blog Website (React, Node.js, JavaScript, Firebase, Tailwind, JWT, MongoDB**)**

- Implemented Firebase for authentication and image storage, including Google Authentication for users.
- Developed a modern blog editor using Editor.js, supporting dynamic blog pages and URLs.
- Designed a search functionality for blogs and users, with dedicated user profiles and social links.
- Built a dashboard to manage blog posts, including features for analytics, editing, deleting, and saving drafts.
- Created a responsive, interactive UI using Tailwind CSS, including nested comments, notifications, and profile management.

Fresh-Drink - E-Commerce Website (React, Node.js, JavaScript, Firebase, Tailwind, JWT, MongoDB, Razorpay**)**

- Developed the Fresh-Drink E-commerce platform using React and Node.js, integrating JWT and Firebase for secure authentication.
- Integrated Razorpay payment gateway for seamless online transactions.
- Implemented dynamic product search functionality, improving the user experience.
- Designed a scalable backend architecture for managing product data and user sessions.

SocialMedia - Content-Generator (Next.js, React, TypeScript, Clerk, Tailwind, Drizzle, Shadcn, Razorpay**)**

- Built an AI-powered Social Media Content Generator with Next.js, React, and TypeScript for optimized performance and scalability.
- Integrated Clerk for user authentication with JWT, enhancing user security.
- Used Drizzle ORM for efficient database management and Razorpay for secure payment processing.
- Designed an interactive UI/UX with Shadcn components for a responsive, user-friendly interface.

Aora - Image and Video Sharing App (React Native, Appwrite**)**

- Developed an image and video sharing application using React Native.
- Leveraged Appwrite for authentication, database, and media storage solutions.
- Designed and implemented features such as user authentication, media uploads, and personalized feeds.
- Focused on delivering a responsive, cross-platform experience with a sleek UI and smooth performance.

EDUCATION

Master Degree @ JAIN (Deemed-to-be University)   Present
 Master of Computer Applications (MCA)

Bachelor Degree @ Surana College   July 2024
Bachelor of Computer Application - CGPA: 8.0

CERTIFICATIONS

The Complete 2024 Web Development Bootcamp — Udemy

Completed on June 9, 2024 | Instructor: Dr. Angela Yu
